Break-out session: A
How to set up a GB framework

Klas Eklund
Mumbai
November 17, 2017
The five steps of the Green Bonds
A concept of simplicity built on five pillars

1. Definition
   Use of proceeds
   - Identification and definition of investment areas / assets which are eligible for GB financing

2. Selection
   Process for project evaluation/selection
   - The GB selection process ensures the right assets in line with the GB framework are evaluated and selected

3. Verification
   Assurance through external review
   - Credibility is essential for the long-term development of the GB market place

4. Monitoring
   Management of proceeds
   - The proceeds raised via the GB should be earmarked for lending to the established eligible Green criteria

5. Reporting
   Transparency
   - To uphold credibility it is essential to be transparent towards investors and the market

The Green Bond universe
- Energy efficiency and other energy related initiatives (e.g. renewables) are driving the market at the moment
- Other project types include energy efficiency, sustainable housing, water management and waste management

Overview of selection process
- Establish procedures and secure ongoing monitoring
- It is recommended to include climate competence in the selection process
- Climate competence function(s) often has veto right in the selection process

Who provides second opinions?
- Ciero, DNV, Oekom, Sustainalytics, Vigeo

Why does SEB use Ciero?
- It's a non profit academic institution
- Ciero is broadly recognized, providing research for G8, OECD, UN and the World Bank
- They have a well developed international network of climate scientists which can be activated for regional development

Example of earmarking
- Second opinion conducted by an independent third party specialist
- The primary objective is to verify the ‘Greenness’ of the investor’s projects/areas
- Additionally, external assurance providers to verify the selection process in line with the Green Bond framework

The investor letter
- Obtained via an annual publically available investor letter
- The letter should include a list of areas financed, a selection of project examples and a summary of the investor’s Green development
- Identification of relevant impact measurements
A typical Green Bond issuance process
Steps 1-4

1. **Internal decision** to finance Green Projects with Green Money
   - Who is the internal driver: Treasury? Sustainability? Management?

2. Prepare a **Green Bond Framework** – define what is green
   - Can/will financial and environmental divisions join forces?
   - Volume vs. quality, broad and comprehensive or narrow and quick, level of specification?

3. **Select** eligible projects
   - Integrate environmental competence in the decision process
   - If needed, in-source environmental competence

4. Secure **verification** – get a **Second Opinion**
   - Choice of Second Opinion provider – most demanding/quickest/cheapest?
   - Adjust Framework based on critical feedback from external environmental experts
A typical Green Bond issuance process
Steps 5-8

5. Safeguard **monitoring** by establishing an **earmarked account** for proceeds/allocation
   - Practical but prudent

6. Commit to **transparency** with regards to use of proceeds
   - Impact reporting
   - Additional work or synergies with other reporting and communication?

7. Coordinate **communication**, internal as well as external
   - Press release, web page and intranet, business papers, conferences and events

8. Prepare the **transaction** to maximize beneficial impact
   - Maximize investor diversification, road show, maturity etc.
## Indicative timeline of the Green structuring process

<table>
<thead>
<tr>
<th>Step</th>
<th>Action</th>
<th>Responsibility</th>
<th>Timeline</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>• Start-up meeting with all relevant colleagues (finance, environment/sustainability, legal, communication)</td>
<td>SEB and Issuer</td>
<td>Week 1</td>
</tr>
<tr>
<td>2</td>
<td>• Draft Green Bond framework for the issuer</td>
<td>SEB</td>
<td>Week 1</td>
</tr>
<tr>
<td>3</td>
<td>• Adjust and tailor-make the framework to match the ambitions of Issuer</td>
<td>Issuer/SEB</td>
<td>Week 2</td>
</tr>
</tbody>
</table>
| 4    | • Prepare information package to CICERO  
  ✓ Issuer’s green ambitions and targets  
  ✓ Environmental policies and strategies (external and internal)  
  ✓ Internal working guidelines  
  ✓ Information on technologies  
  ✓ Description of selection process and follow up procedures  
  ✓ Routines for impact measurements  
  ✓ Other documents that may be relevant from climate perspective | Issuer/SEB | Week 2 |
| 5    | • The framework and guidelines are sent to CICERO for review | SEB | Week 2 |
Indicative timeline of the Green structuring process (continued)

Questions for discussion

DEFINITION
Are the categories to be financed with proceeds from the Green Bonds clearly defined?
What kinds of projects can be financed? What kinds are excluded?
Important issue in India: “Clean coal”?

SELECTION
How is environmental governance secured in the selection process?
Is there enough competence in the organization?
Is the selection process robust and clear?
What position/strength do the “environmentalists” have?

EXTERNAL REVIEW/SECOND OPINION
What are the strengths and weakness of external reviews/Second opinions?
What values does the Second opinion bring – for issuers, for investors?
More questions

EXTERNAL REVIEW/SECOND OPINION
Does the Second opinion convey the right level of information about the issuer’s intentions and commitments from an investor’s point of view? To what extent should the issuer revise the project after the Second opinion?

MONITORING
Is there a dedicated (earmarked) account?
Is the use of proceeds transparent?
Routines for impact measurement?

REPORTING
How will reporting be done? Regularity? Reliable data?
Integrated reporting?
Will investors receive information about environmental impacts?
Will media and the general public?
