- Panel Discussion

15:45 – 16:00  Summary, Conclusions & Next Steps  
*Lilia Caiado, CEBDS*
Managing climate-related and environmental risks, which increasingly impact social, economic and financial systems across the globe, requires massive investment into a more sustainable low-carbon and resource-efficient economy. The Brazilian government’s commitment, in context of the recent ratification of the Paris Agreement, to reduce emissions by 43 percent until 2030 – jointly with market-led initiatives – does not only put carbon-intensive assets and investments at a higher risk but also create new business and investment opportunities.

An increasingly recognized and popular financial instrument used by the public and private sector to effectively raise the capital urgently needed for such a green transformation are Green Bonds. To build and enhance the knowledge on Green Bonds as financing and investment tool, we invite representatives from financial institutions, public and private companies, local governments, (institutional) investors, policymaking and regulatory bodies as well as environmental research, consulting and rating institutions – to join our workshop series on Green Bonds. Participants will learn from leading finance and climate experts and gain profound knowledge and hands-on technical expertise on the pillars that constitute a robust Green Bond framework. These include:

- Definitions, Selection & Verification,
- Monitoring & Reporting,
- and Legal & Market Aspects.

This first workshop within the series focuses on the topics Definitions, Selection & Verification and is addressed to regulators, potential financial institution issuers, investors and banks of Green Bonds. The themes will be scrutinized with respect to the particular needs and questions of participants in order to build and enhance technical expertise in the most targeted and hands-on way.

The workshop takes place in São Paulo at the premises of Schneider Electric (Avenida das Nações Unidas, 18.605, Santo Amaro) on 13 December 2016. Consecutive workshops on the remaining themes will follow in early 2017.

For further details, please contact Yannick Motz (yannick.motz@giz.de) & Mats Olausson (mats.olausson@seb.de).

The workshop series is conducted within the framework of a Strategic Alliance between GIZ and SEB on Green Bond Market Development in G20 Emerging Economies and supported by the Conselho Empresarial Brasileiro para o Desenvolvimento Sustentável (CEBDS), Federação Brasileira de Bancos (Febraban) and the Center for International Climate and Environmental Research – Oslo (CICERO).

As a service provider with worldwide operations in the field of international cooperation for sustainable development, the Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH works together with its partners to develop effective solutions that offer people better prospects and sustainably improve their living conditions. GIZ is a public-benefit federal enterprise and supports the German Government as well as many public and private sector clients in a wide variety of areas, including economic and financial sector development, employment and social security, energy and the environment, and peace and security.

Skandinaviska Enskilda Banken (SEB) is a Swedish universal bank, which has developed the Green Bond concept targeting institutional investors in cooperation with the World Bank. SEB is one of the leading knowledge providers and thought leaders with regards to Green Bond product and overall market development.
